Making Steel Rails.

The rail mill presents many pictures under cultivation, the farmers in that appeal strongly to lovers of the many places having evidently picturesque. Under ordinary circumstances the great strands of iron, each half as long as a city block, slide back and forth smoothly enough between the rolls that are stretching them and pressing them into the required shape, but a tiny obstacle may at any moment and promote our markets abroad? 500 delegates in attendance. Of ing moisture there may be in the turn one of these cables of fire off the beaten track and twist it into a hopeless tangle or wind it like a squirming snake around some unfortunate work-

When the rolling process has been completed, the piece of iron slides along to the great buzzsaws, which cut it up ures, and this will alleviate the into the 30 foot rails known to the railway traveler. Every time the whirring circular saw clips off one of these lengths, sparks radiate in every direction, as though the biggest pyrotechnical pinwheel ever devised had been suddenly set in motion.

When the rail has been cooled and holes have been drilled in it, it is ready to start for any part of the world. The evolution of bars or beams or sheets from the big steel slabs is gained by the same general method of procedure. It is the size and shape of the grooves in the rolls which determine the form to be ultimately assumed by the steel in their clutches.-Century

An Anecdote of General Jackson, General Jackson, while on one of his journeys to Tennessee about the time of the nullification excitement, arrived at a Virginian village in a very impatient state of mind, both with public affairs and with the state of the roads. The president was entertained as a guest at the house of a lady in the village, and, although he tried to be polite, the state of vexation which he was in affected him visibly.

His hostess, at the supper table, was much alarmed to see the general swallowing with great rapidity a cup of al-
